- 15.1 The parties agree that this Agreement together with the Data Protection Impact Assessment applicable to this Service [and any Framework Contract between the Supplier and the Buyer] together constitute the entire agreement between them and supersede all previous agreements, understandings and arrangements between them, whether in writing or oral in

respect of its subject matter. [Where the terms of this Service Level Agreement conflict with the terms of the Framework Contract, the Framework Contract will prevail but the terms of this Service Level Agreement may be used for interpretation in the case of ambiguity or where the Framework Contract is silent.]

- 15.2 Each party acknowledges that it has not entered into this Agreement in reliance on, and shall have no remedies in respect of, any representation or warranty that is not expressly set out in this Agreement [or any Framework Contract between the Supplier and the Buyer] or the Data Protection Impact Assessment applicable to this Service. Open Medical may also create a case study relating to the Services for distribution to third parties or publishing on its website, in relation to which it will seek approval from the Buyer prior to such distribution or publishing (such approval not to be unreasonably withheld, conditioned or delayed by the Buyer).

16 Force majeure

Neither party shall have any liability under or be deemed to be in breach of this Agreement for any delays or failures in performance of this Agreement which result from any event beyond the reasonable control of that party. The party affected by such an event shall promptly notify the other party in writing when such an event causes a delay or failure in performance and when it ceases to do so. If such an event continues for a continuous period of more than 2 months, either party may terminate this Agreement by written notice to the other party.

17 No partnership or agency

The parties are independent businesses and are not partners, principal and agent or employer and employee and this Agreement does not establish any joint venture, trust, fiduciary or other relationship between them, other than the contractual relationship expressly provided for in it. - 19.1 Each clause of this Agreement is severable and distinct from the others. If any clause in this Agreement (or part thereof) is or becomes illegal, invalid or unenforceable under applicable

law, but would be legal, valid and enforceable if the clause or some part of it was deleted or modified (or the duration of the relevant clause reduced):

- 19.1.1 the relevant clause (or part thereof) will apply with such deletion or modification as may be required to make it legal, valid and enforceable; and
- 19.1.2 without limiting the foregoing, in such circumstances the parties will promptly and in good faith seek to negotiate a replacement provision consistent with the original intent of this Agreement as soon as possible.

20 Waiver

No failure, delay or omission by either party in exercising any right, power or remedy provided by law or under this Agreement shall operate as a waiver of that right, power or remedy, nor shall it preclude or restrict any future exercise of that or any other right or remedy. No single or partial exercise of any right, power or remedy provided by law or under this Agreement shall prevent any future exercise of it or the exercise of any other right, power or remedy.

21 Set off

Each party must pay all sums that it owes to the other party under this Agreement without any set-off, counterclaim, deduction or withholding of any kind, save as may be required by law.

Schedule 1

Data Protection Impact Assessment

If the Buyer wishes us to include its DPIA, it may be attached or incorporated into this document by reference or hyperlink here

Schedule 2

Identity Access Management Systems and Single Sign-On Systems

If the Buyer is operating an IAMS and/or SSO system, this Schedule should be included in the SLA

The Buyer acknowledges and accepts that where the Buyer has chosen to implement a third-party IAM or SSO System to control access to and use of the Pathpoint Service, the following additional terms will apply:

1. **Access and Authentication:** The Buyer is solely responsible for maintaining the confidentiality and security of its user accounts and associated passwords (for example, it must ensure that a strong and secure password is created and that its users understand this must be protected from unauthorised access). The Buyer must therefore determine as part of its implementation process which areas of the Pathpoint platform each user is permitted to access (for example, certain staff grades do not have the ability to view/alter certain records within the Pathpoint platform, and certain teams can/cannot access data relating to other teams).
2. **IAMS/ SSO management and cooperation:** The Buyer agrees that the Supplier's responsibilities do not extend to the internal management or administration of the IAMS or SSO system which gives access to the Service for the Buyer's users. The Buyer will inform the Supplier of the identity of the person/team within the Buyer's organisation that is responsible for IAM or SSO management prior to any Service implementation and Software installation, and will ensure that the administrator provides reasonable cooperation to the Supplier to enable the implementation to proceed on schedule.
3. **Compliance:** The Buyer will ensure that:
 - (a) all its users use the Service correctly and in compliance with this Agreement;
 - (b) all its users take commercially reasonable efforts to prevent and terminate any unauthorised use of, or access to, the Services; and
 - (c) the Buyer is solely responsible for monitoring, responding to, and otherwise processing any alerts relating to potential abuse or unauthorised access to the Service and the Buyer will promptly notify the Supplier if the Buyer becomes aware of any abuse /unauthorised use; and
 - (d) the Supplier shall have the right to investigate any potential violation, abuse or unauthorised use of the Service, which may include reviewing Buyer Data and administrator logs relating to IAMS or SSO management.
4. **Limitation of Support Function:** Where the Buyer has chosen to implement a third-party IAM or SSO System to control access to and use of the Pathpoint Service, the Buyer acknowledges that any queries in

relation to logins and user authentication will be the sole responsibility of the Buyer's IAMS or SSO system administrator.

5. **Exclusion of Liability:** The Buyer acknowledges and accepts that where the Buyer has chosen to implement a third-party IAM or SSO System to control access to and use of the Pathpoint Service:

- (a) the Supplier bears no liability for that third-party IAM System's acts or omissions;
- (b) the Supplier has no responsibility for the operation of the third-party IAM System; and
- (c) the Supplier will not be liable or be required to remedy any problem arising from or caused by the Buyer's use of an IAM or SSO system.

The Buyer's attention is drawn to the Buyer warranties at clause 2.3 of this Agreement. Any user accessing the Software platform after a hiatus of more than 30 days will be flagged up automatically by the Supplier and the Buyer's administrator will be informed by email and will be required to take its own steps to ensure that there has been no unauthorised access of the Software Service.

6. The Buyer acknowledges and agrees that:

- (a) The Supplier is not and cannot be aware of the extent of any potential loss resulting from any failure by the Supplier to discharge its obligations under this Agreement;
- (b) The Service has not been designed to meet the Buyer's individual requirements and can not be tested in every operating environment; and
- (c) It is the Buyer's responsibility to ensure the facilities and functions of the Service meet the Buyer's requirements and will not cause any error or interruption in the Buyer's own software or systems.

7. **Configuration:**

- (a) The Buyer is responsible for configuring each user's access which will include, by way of SSO, access to the Service. The Buyer must therefore determine as part of its configuration process which areas of the Pathpoint Service each user is permitted to access by means of their SSO (for example, certain staff grades do not have the ability to view/ alter certain records within the Pathpoint platform, and certain teams can/cannot access data relating to other teams).
- (b) The Supplier will support the Buyer to set up the initial configuration process according to the Buyer's specific needs and instructions. The terms of that cooperation and support are set out in the Open Medical Authorisation and Authentication Standard Operating Procedure. The Supplier's role is limited to ensuring that the Buyer's authorised persons have access to the relevant areas of the Pathpoint Service. Thereafter, the Buyer is solely responsible for managing the identification, authentication and access processes.
